OCTOBER HARVEST 2022

The Japanese autumn harvest for the Nisai (2-year-old koi) is coming soon. Starting from October, it is the time of the year when breeders haul out their cream of the crop for the world to see.

Competition creates a buyer's frenzy to have a first choice at the latest batch of Living Jewels being on display.

Harvest time lasts over several weeks. It appears a bit chaotic, unpredictable at first, but is controlled by factors like weather, farmer's workload, fish health, and availability of pond space.

While buyers and their scouts dash

around from farm to farm to offer the best first. Please be patient.

As always, we will post images of koi on our Whatsapp Koi Harvest Group. We are awarded a limited time by the breeder to present a bowl, so please choose quickly, but choose wisely.

Let us know if you wish to be on the harvest group.

ULTIMATE FILTRATION SYSTEM

The ultimate in koi pond filtration systems were commissioned in Paarl some time ago.

This pump fed Pro-Drum and ProBio with Mutag BioChip biofilter sports all the level control and add-ons one can wish for.

What is unique is that the filter is more than 30 meters from the pond and installed in the owners mancave.

Since due consideration was given on pipe sizing, this pump operates on less than 300W.

SUPPORTING THE INDUSTRY

KoiNet provides **online shopping** for the aquaculture and pet trade. Whether your interest is aquaculture production, keeping of koi, goldfish, ornamental fish, food fish, you are at the correct address.

Browse our online catalogue or Takealot.com to buy safe and secure. We will deliver.

For almost 30 years we have been providing koi, products, consultation, information, and literature to the trade.
